

Diaphragm Valve, Plastic

Construction

The pneumatically operated 2/2 way diaphragm valve GEMÜ 600 is a corrosion-resistant all plastic construction. It has a maintenance-free piston actuator which can be controlled by any inert gas. GEMÜ 600 has a stroke limiter and an integral optical position indicator. The control functions "normally closed", "normally open" and "double acting" are available.

Features

- Suitable for inert and corrosive* liquid and gaseous media
- Valve body and diaphragm are available in various materials
- Connection for pilot valves acc. to NAMUR
- Control connection positioned in-line with piping as standard, thus installable in extremely restricted spaces
- Optional flow direction and mounting position

Advantages

- Variable spring facility for working pressures up to 10 bar upstream and downstream
- Mounting plate for height compensation of differing body dimensions
- Upper part of actuator rotatable 4 x 90°
- Optional accessories
 - Electrical remote indication
 - Electrical position indicator with microswitches or proximity sensors
 - Pneumatic or electro-pneumatic positioner

* see information on working medium on page 2

Actuator dimensions (mm)

DN	B	B1	A	A1	A2
15-25	100	11	141	73	24
32-40	125	9	192	93	65
50	150	8	230	110	65

Technical specifications

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

Max. perm. temperature of working medium:
see data sheet "Technical Information on Plastic Materials"

Control medium

Inert gas

Min. required control pressure see table below

Max. permiss. control pressure 6 bar

Max. permiss. temp. of control medium 40° C

Order specifications

Nominal size	Control function 1 (bar)		Control functions 2+3 (bar)		K _v value	Weight
(mm)	Working pressure*	Control pressure	Working pressure	Control pressure	(m³/h)	(kg)
15	0 - 10**	4 bar	0 - 10	min. 3 bar	5.6	1.8
20	0 - 10**		0 - 10		8.2	1.8
25	0 - 10**		0 - 10		10.5	1.8
32	0 - 10**	6 bar	0 - 10	max. 6 bar	18.0	4.0
40	0 - 10**		0 - 10		25.0	4.0
50	0 - 10**		0 - 10		46.0	7.4

* Working pressure applied upstream only; ** Working pressure with PTFE diaphragm (ref. no. 52): 0-6 bar - further designs on enquiry.
All pressures are given as gauge pressures.
